

Site Audit: Detailed Issue: Links with no anchor text

themegaradio.com

- The website currently has 114 links that are missing descriptive text, also known as anchor text.
- Anchor text is the visible, clickable text in a hyperlink. It helps both website visitors and search engines understand what a linked page is about before they click on it.
- Without this descriptive text, it can be more challenging for search engines to properly understand the content of the linked pages, which can affect how well those pages appear in search results. It also makes navigation less clear for users.
- All of these 114 issues were newly identified on May 12, 2026.
- To improve the clarity for users and search engines, it is recommended to add clear and concise descriptive text to these links.

This report provides a snapshot of current activity. Deeper trend analysis will become more reliable with a longer data history.

Links with no anchor text

Project name: Tr

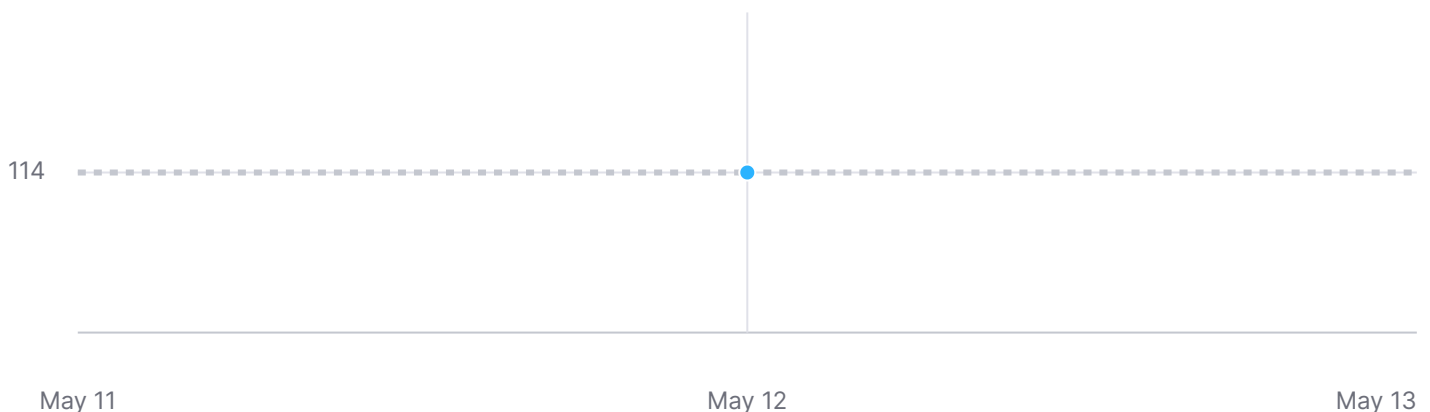

Detailed Issue Description

About this issue:

The issue is triggered if a link (external or internal) on your site has an empty or naked anchor (i.e., just a URL), or anchor text only contains special characters. This issue makes it difficult for the crawlers to understand what the page is about and affects the performance of the linked-to page in search results.

How to fix:

Use anchor text for your links where it is necessary. The link text must give users and search engines at least a basic idea of what the target page is about. Also, use short but descriptive text. [Learn more](#)

Only the first 100 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.
